SKILLS

Languages&Frameworks: HTML5, CSS3, JavaScript (ES6+), React.js, Vue.js,Tailwind CSS, Sass , Node.js, Express.js
Frontend Tools & Integration: RESTful APIs, GraphQL, JSON handling, Authentication (JWT/session), Browser Storage (LocalStorage, SessionStorage, IndexedDB), Git & GitHub, CI/CD pipelines
Testing & QA: Unit Testing, Integration Testing, End-to-End (E2E) Testing, Jest, React Testing Library, Cypress
Project Tools & Workflow: Jira, Bitbucket, GitHub, Postman, Figma, Slack

PROFESSIONAL EXPERIENCE

NanotechTechnologiesSeniorFrontendDeveloper 2024 – Sep2026

- Contributed to the design, development, and maintenance of a comprehensive Accounting and ERP platform serving complex business operations and financial workflows.
- Developed and enhanced key modules including General Ledger, Double-Entry Accounting, Inventory Management, Purchasing, Sales, Expenses, and Reporting, while ensuring accuracy, performance, and scalability across the system.
- Led the frontend team, established development standards, mentored developers, and collaborated closely with backend engineers, accountants, and stakeholders to deliver enterprise-grade financial management solutions.

Lajward Technologies (Turkey) Mid-Level Frontend Developer 2023-2024

- As a Mid-Level Frontend Developer, I participated in the development and maintenance of multiple web-based business applications across different industries.
- One of my most significant projects was contributing to a large-scale Hospital Management Information System (HMIS). The platform was built from the ground up and designed to support end-to-end hospital operations, including patient management, clinical workflows, administration, billing, and other critical healthcare processes. I worked as part of a cross-functional team, collaborating with frontend developers, backend engineers, support teams, and domain specialists to implement complex workflows aligned with international hospital management standards.
  My work included E-commerce platforms, Human Resource Management (HRM) systems, Point of Sale (POS) solutions, Restaurant Management Systems, and other enterprise management applications. I collaborated closely with frontend and backend teams to deliver responsive, scalable, and user-friendly interfaces.

Web PROJECTS

HesabdarAccountingSystem : Developed features for an advanced accounting platform designed around international accounting standards and local business requirements.

Business Management & Accounting System | Personal Project (In Development)

• Full-stack application built with React, TypeScript, Node.js/Express, and MySQL to explore double-entry accounting workflows for items, vendors, bills, payments, and financial accounts.

• Developing bill-status workflows, complex validated forms, and allocation logic for applying payments across outstanding bills.

Case study: View project in portfolio

POS: Developed modules for customer management, sales tracking, product registration, and operational reporting.

operational reporting.Click Online Shop: An e-commerce platform allowing effortless item discovery and purchase.

Also Developed: Exchange, MIS, Recharge, Mazza and some personal projects.
